Mineral Oil Hydrocarbons (C10-C50)	5		Internal (CC/GC) ^a	mg/kg	8	±1	-

^a Method outside the scope of accreditation. ^d Compound outside the scope of accreditation.

The above results concern only the sample we examined.

Partial reproduction is prohibited without the written permission of multichrom.lab.

n.d. - not detected. LoQ - limit of quantitation of the method (the concentration of a substance at which quantitative results can be reported with a high degree of confidence for the given analytical procedure). LoD - limit of detection of the method (the lowest concentration of a substance that can be distinguished from the absence of that substance for the given analytical procedure).

Uncertainty is based on the combined standard uncertainty calculated using a K factor = 2 for assuring a confidence level of 95%.

^a Method outside the scope of accreditation. ^d Compound outside the scope of accreditation.

The above results concern only the sample we examined.

Partial reproduction is prohibited without the written permission of multichrom.lab.

n.d. - not detected. LoQ - limit of quantitation of the method (the concentration of a substance at which quantitative results can be reported with a high degree of confidence for the given analytical procedure). LoD - limit of detection of the method (the lowest concentration of a substance that can be distinguished from the absence of that substance for the given analytical procedure).

Uncertainty is based on the combined standard uncertainty calculated using a K factor = 2 for assuring a confidence level of 95%.
